PRODUCT DATASHEET

SH5007SAT

Self-Amalgamating Tape 0.76mm x10m x19mm

Product Description:

The self-amalgamating tape is designed for insulation protection of the end or middle connections of wire and cable with 35kv or below on the environmental temperature between -10°C~80°C, insulative sealing for communication cable connections, pipeline protection, remedy and dealing.

High tensility and electricity, high voltage tolerance, excellent air tightness, good weathering and aging resistance.

Technology Data (Typical Values):

Thickness (mm)	Tensile Strength (MPa)	Elongation (%)	Disruptive Strength (kV/mm)
0.76	1.2	500	12

*Remark: the upwords data is general average, only for reference, not as a product specification, the actual product data is according to the actual test result.
